- Walls: 70D, 190T, Nylon Taffeta
- Mesh: Nylon No See-um Mesh, 40D

Specs

Color: Tan/Green/Tan
 Style: Two-pole rectangular dome
 Use Rating: 3 Season

The **Meramac ZF series** tents are all free standing 2-pole designs with shock corded fiberglass or aluminum ferrules. The ferrules are the "connectors" that hold the poles together and we use aluminum, rather than steel, because aluminum can never rust. Our fiberglass poles are also normally one size larger than normal to offer you a sturdier, stronger tent. We use lightweight but strong polyester fabrics. The walls are uncoated so the tent can "breathe" under the urethane coated fly. The fly uses a pole in the top, which gives you an awning over each door for excellent rain protection. Our fly is full length on the sides, not 3/4 length like some others, for better weather protection. We even have our factory seal the seams on the floor and fly for maximum water repellency. Entry and exit are enhanced with 2 doors, which means if you have to get out at night, you don't need to crawl over the others to get to the only door. The second door is also nice for extra ventilation in hot, muggy weather. Our door zippers are a #8 (non-ZF Series), which is one size larger than most, for extra durability. Mesh storage pockets and a gear loft are included to help you keep your gear organized.

ZF Series: which stands for bigger Zipper and heavier Floor. The zipper for a ZF model is upgraded from a #8 to a #10. The floor used in the ZF models is a 4 oz. nylon oxford, which is almost twice as heavy as normal nylon taffeta floors. ZF models do not have windows on fly.

Assembly is really easy with the tent clips that just snap in place over the poles. The polyester fly and oxford floor are urethane coated, with factory sealed seams for maximum weatherproofness. The 2 doors make getting in and out of the tent much easier, especially in the middle of the night when you need to take a quick "break". The fly buckles to the tent, offering a much more secure attachment when compared to elastic cord. Mesh roof vents increase ventilation and improve star gazing.

The Meramac 5 ZF FG lists for \$229.99, but you can own yours for \$95.00!!!!
